

HD Probe

Tubular Lens System for Superior Quality High Definition Work.

Innovision Optics has been providing tubular optics to the video and film industry since 1987. The initial lenses were developed from endoscopic technology and included fiber optics to light the way.

Innovision pioneered the original Probe Lens which brought a new dimension to table top shooting. The Probe II offered higher resolution and faster speed than Probe I.

Now, Innovision introduces the HD Probe, manufactured by Century Precision Optics, and developed especially for HD projects that require the highest resolution images.

The HD Probe's barrel lets the camera roam over, under, around or even through objects, unleashing a novel range of tabletop shooting possibilities. HD Probe offers direct view and 90 degree viewing options.

The HD Probe features high resolution glass elements and relay optics for images with remarkable edge-to-edge sharpness, and extreme depth of field. State-of-the-art multiple coatings provide sharp low dispersion images.

The HD Probe easily covers all 4:3 and 16:9 aspect ratio formats. The HD Probe is similar to the Probe II Plus family in 35mm film and 16mm versions.

HD Probe lenses, rated at T3.3, come with a set of five interchangeable front objectives ranging from 5-23mm focal lengths. All HD Probe lenses are waterproof.

Interchangeable lens mounts offer simple adaptation to 2/3" bayonet or Panavision professional HD cameras.

For hands-off focus, Innovision offers an optional remote follow focus.

HD Probe

HD Probe System Specs

Speed:	T3.3-T22
Barrel Diameter:	1.7"(43mm)
Objective Lenses:	5mm, 8mm, 12mm, 17mm, 23mm
Focusing Ring:	72 teeth, 0.8 module
Optional Accessories:	Remote focus control, lens mounts, shipping cases

HD Probe in Direct View

Weight:	4.9lbs (2kg)
Length:	19" (48cm)
Waterproof to:	14" (36cm)Deep

HD Probe in 90 Degree View

Weight:	4.9lbs (2kg)
Length:	14" (35cm)
Waterproof to:	9" (23cm)Deep
